THE CHALLENGE

New developments in Information and Communication Technology are much faster today than in the past and require an update of the NATO Acquisition Procedures to keep up with the times.

As the development rate continues to increase, this hampers NATO's ability to deliver the best solutions.

In order to keep pace with technology changes, NATO's acquisition approach should be more rapid, agile and take advantage of industry best practices.

NIAG I2A2 OBJECTIVE

The objective of the NIAG Industry Initiative for Agile Acquisition is to take the broadest possible input from across industry to inform NATO on how it can/should improve its technology intensive acquisition process.

ABOUT NIAG I2A2

The NIAG Industry Initiative for Agile Acquisition (I2A2), launched in 2019, is a voluntary industry study officially endorsed by NIAG (NATO Industrial Advisory Group).

Initial crowdsourced industry recommendations were generated through the I2A2 platform in 2018. This follow-up NIAG study aims at refining the initial input to improve the NATO Acquisition Process and match the fast-paced change in Information and Communication Technology developments.

HOW TO CONTRIBUTE

1. In the NIAG I2A2 survey, you can review, rate and comment on initial crowdsourced recommendations, and propose new recommendations.

You will receive the survey results at the end of the study.

2. You can also share the NIAG I2A2 survey with your peers.
